

NEW!

Vactor® Higbee Vacuum Tubes

Higbee vacuum tubes represent a revolutionary design in vacuum tube extensions. Now, achieving the right depth and right suction is faster and more convenient than ever. Unlike conventional tubes that require air adapters, the new Higbee tubes utilize a special inner tube with fixed air ports to regulate air flow and suction. Just add the Higbee tube extensions and start the work. Higbee tubes are made of lightweight aluminum and powder coated for a durable finish.

Specifications:

- 8" welded flange diameter
- 8" inner tube diameter
- 10" outer tube diameter
- Rivet crown
- Powder coated
- 19 – 42 lbs
- 89957A 36" length
- 89957 78" length

Applications:

- Deeper depths
- Skimming
- Vacuum under water
- Catch basin cleaning

Effective 4/05
